## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1, 5-7 and 9, drawn to a first method using a GLP-1 molecule, classified in class 424, subclass various.
- II. Claims 2, 5-7 and 9, drawn to a second method of using said molecule, classified in class 514, subclass various.
- III. Claims 3, 5-7 and 9, drawn to a third method of using said molecule, classified in class 530, subclass various.
- IV. Claims 4-7 and 9, drawn to a fourth method of using said molecule, classified in class 435, subclass various.
- V. Claims 8 and 9, drawn to a fifth method of using said molecule, classified in class 436, subclass various.

The inventions are distinct, each from the other because of the following reasons:

The several inventions above are independent and distinct, each from the other.

They have acquired a separate status in the art as a separate subject for inventive effect and require independent searches (as indicated by the different classification).

The search for each of the above inventions is not co-extensive particularly with regard to the literature search. Further, a reference which would anticipate the invention of one group would not necessarily anticipate or even make obvious another group.

The remaining groups are directed to different inventions which are not connected in design, operation, or effect. These methods are independent since they are not disclosed as capable of use together, they have different modes of operation, they have different functions, and they have different effects. One would not have to practice the various methods at the same time to practice just one method alone.

As clearly evidenced by the claims themselves, the method of Group I is drawn to using GLP-1 molecule which is totally unrelated to the method of Group II which is drawn to another method of using the molecule. Similarly, the method of Group III is drawn to another method of using the moleule which again is totally unrelated to the method of Group I.

Groups I-III are directed to different inventions which are not connected in design, operation, and/or effect. These methods are independent since they have different modes of operation, they have different functions, and/or they have different effects. One would not have to practice the various methods at the same time to practice just one method alone.

As evidenced by the claims themselves, the GLP-1 molecule can be used in many different methods to treat different things.

Application/Control Number: 09/982,978

Art Unit: 1651

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael V. Meller whose telephone number is 703-308-4230. The examiner can normally be reached on Monday thru Friday: 9:00am-5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Wityshyn can be reached on 703-308-4743. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-0294 for regular communications and 703-308-0294 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0196.
